

Test documentation

In this document there are four sections;

1. Manual tests – Tests that were written and executed, with results, steps and pass/failure status recorded, along with screenshots (see section 4)
2. Automated Tests – .py tests run in Django to test the individual functions of the code
3. User feedback – A test of what the audience of the website thinks of sprint 1.
4. The screenshot index – referenced in section 1, contains an itemised list of the relevant screenshots for the associated test.

Manual tests

Codes explained:

Auth -> authentication

Rbac -> role-based access control

ExMa -> exhibit management

Quiz -> quiz taking

Game -> gamification

Priv -> privacy and data deletion

Test ID	Description	Steps to reproduce	Expected results	Actual results	Pass/Fail	Screenshot ID
Auth001	Register a new visitor account	1.Navigate to /register/ 2.Fill in username, password, password confirmation 3.Click submit	Account is created, user is redirected to /login/, no error messages appear	Register page loaded correctly, account was created, was directed back to log in page, no errors.	Pass	Auth001
Auth002	Login with valid details	1.Navigate to / 2. Enter a valid username and password 3. Click Log In	User is logged in and redirected to the home page	User logged in successfully and was redirected to homepage	Pass	Auth002

Auth003	Login in with invalid details	1. Navigate to /login/ 2. Enter an incorrect username or wrong password 3. Click Log In	Login fails; an error message is displayed; user remains on login page	Login fails, error message displayed, user remains on login page	Pass	Auth003
Auth004	logout	1. Log in as any user 2. Click the Logout link/button	Session ends; user is redirected to home or login page; protected pages are no longer accessible	User is logged out and redirected to home page, protected pages are no longer accessible	Pass	Auth004
rbac005	Non-logged-in user visits curator dashboard	1. Ensure you are logged out 2. Navigate directly to /curator/dashboard/	User is redirected to /login/?next=/curator/dashboard/ — they cannot access the page	User redirected to login	Pass	rbac005
rbac006	Logged-in standard user visits curator dashboard	1. Log in as a regular user (not staff, not in Curator group) 2. Navigate to /curator/dashboard/	User is redirected away with an error message: 'you do not have curator permissions'	User is shown a debug page instead of a user friendly error warning	Fail	rbac006
rbac007	Curator accesses curator dashboard	1. Log in as a staff user or a user in the Curator group 2. Navigate to /curator/dashboard/	Dashboard loads correctly; active and archived exhibits are listed; total quiz count is shown	Dashboard loads correctly, all exhibits loaded (no archived functionality), quiz count not shown	½ (loads correctly, lacks functionality)	rbac007
exMa008	Curator creates a new exhibit	1. Log in as curator 2. Go to /curator/create/ 3. Fill in Title, Description, and other fields 4. Click Save	Exhibit is saved; success message appears; exhibit is visible on the curator dashboard under Active Exhibits	Exhibit is created and saved successfully confirmation message appears, appears in dashboard and for user	Pass	exMa008
exMa009	Create exhibit with missing required fields	1. Log in as curator 2. Go to /curator/create/ 3. Leave Title blank 4. Click Save	Form does not submit; a validation error appears highlighting the missing required field	Form doesn't submit, prompt to enter info appears at missing field	Pass	exMa009
exMa010	Upload a file attachment to an exhibit	1. Log in as curator 2. Create or edit an exhibit 3. Attach a PDF or image file using the file field 4. Save	Exhibit saves with the file; the file is accessible from the exhibit detail page	The exhibit did save with file but the file is not accessible from the detail page	Fail	exMa010
exMa011	Curator edits an existing exhibit	1. Log in as curator 2. On the dashboard, click Edit on any exhibit	Changes are saved; success message appears; updated content is visible on the	Changes saved, success message appears, updated content visible on detail view page	Pass	exMa011

		3. Change the title or description 4. Save	dashboard and exhibit detail page			
exMa012	Curator deletes an exhibit	1. Log in as curator 2. On the dashboard, click Delete on an exhibit 3. Confirm deletion	Exhibit is permanently removed; success message appears; exhibit no longer appears on the dashboard	Exhibit deleted permanently, success message appears no longer appears on dashboard.	Pass	exMa012
exMa013	Public user views an exhibit detail page	1. Without logging in, navigate to /exhibit/<id>/ for a valid exhibit ID	Exhibit detail page loads correctly; title, description, and associated quizzes are shown; no login required	Page loads correctly, quiz shown, no log in needed.	Pass	exMa013
exMa014	User navigates to a non-existent exhibit (invalid ID)	1. Navigate to /exhibit/99999/ (an ID that does not exist)	A 404 or redirect occurs— the site does not crash or show a raw error page	Redirect occurs back to main screen	Pass	exMa014
quiz015	Logged-in user takes a quiz	1. Log in 2. Navigate to an exhibit page 3. Click a linked quiz 4. Answer all questions 5. Submit	Quiz loads with all questions; after submission the results page shows correct/incorrect answers and points earned	Quiz loads, results are shown, correct and incorrect answers clear	Pass	quiz015
quiz016	Submit quiz with all correct answers	1. Log in 2. Take a quiz where you know the correct answers 3. Select all correct options 4. Submit	Results page shows 100% score; correct_count equals total_count; points are awarded equal to correct_count	Shows 3/3, shows 3 points awarded	Pass	quiz016
quiz017	Submit quiz with all incorrect answers	1. Log in 2. Take a quiz 3. Deliberately select all incorrect options 4. Submit	Results page shows 0% score; the correct answers are revealed for each wrong answer; 0 points are awarded	Shows 0/3, shows 0 points rewarded	Pass	quiz017
quiz018	Guest (unauthenticated) takes a quiz	1. Log out completely 2. Navigate to /quiz/<id>/ 3. Answer questions 4. Submit	Quiz works for guests; results page loads correctly; 'Points' only recorded if they log in	Quiz works for guests but they must log in to save points	Pass	quiz018
quiz019	Navigate to a non-existent quiz (invalid ID)	1. Navigate to /quiz/99999/ (an ID that does not exist)	A 404 or user-friendly redirect occurs; the site does not crash	Redirect to main page	Pass	quiz019

game020	Points increase after submitting a quiz	1. Log in 2. Note your current points (profile/admin) 3. Complete a quiz 4. Re-check your points total	Points total increases by the number of correct answers; the increase is reflected on the results page	Points total increased by expected amount (3)	Pass	game020
priv021	View privacy policy page	1. Without logging in, navigate to /privacy/	Privacy policy page loads correctly with no login required	Loads correctly, no log in required	Pass	priv021
priv022	Logged-in user views Delete My Data page	1. Log in 2. Navigate to /delete-my-data/	A confirmation page loads explaining that the account and all associated data will be deleted	Data is deleted but no confirmation	Fail	priv022
priv023	User deletes their account and data	1. Log in as a test user 2. Navigate to /delete-my-data/ 3. Submit the deletion form (POST)	User account is deleted; all quiz attempts, responses, and badges are removed; user is redirected to home page and cannot log in again	Data is deleted fully	Pass	priv023

[the screenshot appendix for these tests is at the bottom of the document]

User Feedback Analysis

DISCLAIMER There are some tests missing, for example curator tool tests, due to issues with communication and a lack of time to fix this.

For the conducted manual tests, most passed perfectly. Some – however – did not. Below is a list and analysis of why each one failed, along with plans for sprint 2 to ensure the issues are fixed:

- Rbac006: The user is shown a debug page instead of a user-friendly warning. This is not ideal as it suggests the website is not functioning as intended. To fix this; we will add the user-friendly warning page and ensure that the debugging pages never appear for the end user.
- Rbac007: The dashboard does load correctly but doesn't yet have the desired functionality present. This is an issue as there is no distinction between achieved and active exhibits (a curator function that will be added in sprint 2). We plan to fix this by creating the system to achieve and unarchive the exhibits, as well as display these separately and clearly in the curator dashboard, while ensuring only active exhibits are shown to visitors on the navigation page. Additionally, we have not yet added functionality for statistics.
- exMa010: The file uploaded successfully but didn't appear on the visitors view of the exhibit. This means that the user is unable to view and interact with the attached files. This will be fixed by updating the exhibit model detail page to include a space for the attachments.
- Priv022: The data is deleted, but there is no confirmation. This may lead to confusion for the user. This will be fixed by adding a clear message informing the user when data is fully deleted.

Automated Tests

Below are screenshots of the terminal output when running the automated tests. These tests are located in `4_code/djangoCode/museum/tests`

There are 7 automated test files, each containing tests for the relevant sector. As the screenshots below show, they all executed perfectly.

Unfortunately as of the submission date of sprint 1, there are no comments explaining what each does, but we will be sure to add them in for sprint 2.

User Feedback Tests

It was easy to navigate the museum and find exhibits

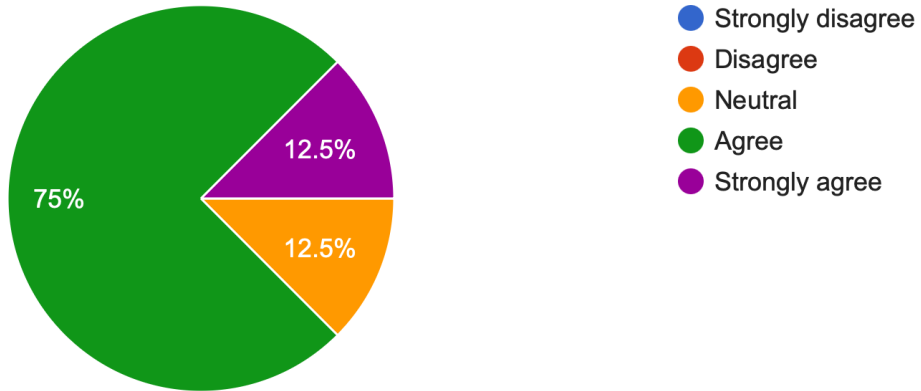

8 responses

- Strongly disagree
- Disagree
- Neutral
- Agree
- Strongly agree

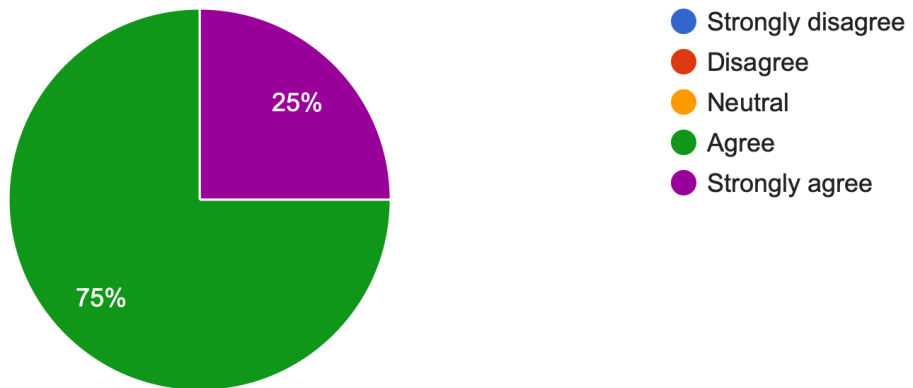

The exhibit page gave you enough information to understnad the Ai failure

8 responses

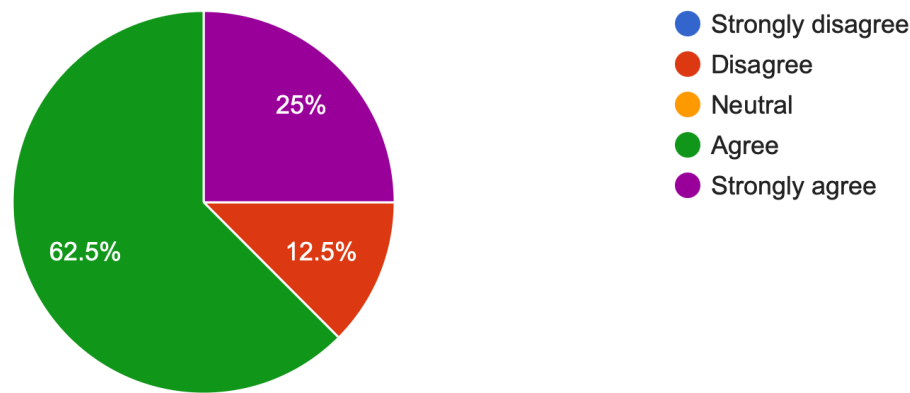

The quiz questions relevant and clearly worded

8 responses

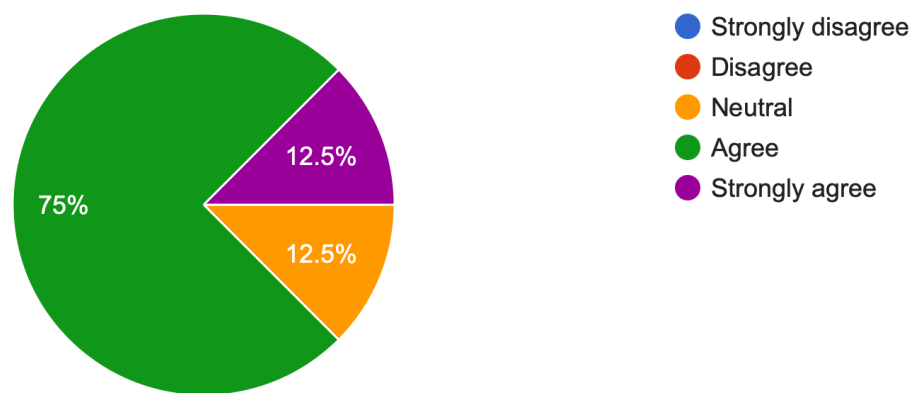

The points were encouraging and easy to understand the purpose of

8 responses

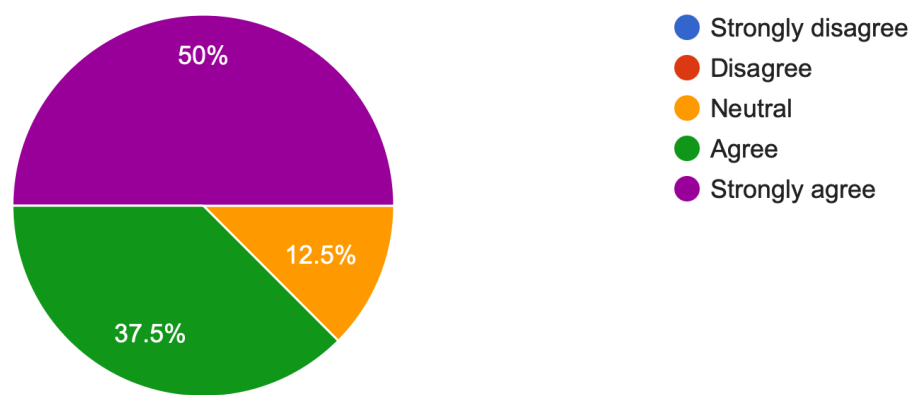

Nothing felt broken or behaved unexpectedly

8 responses

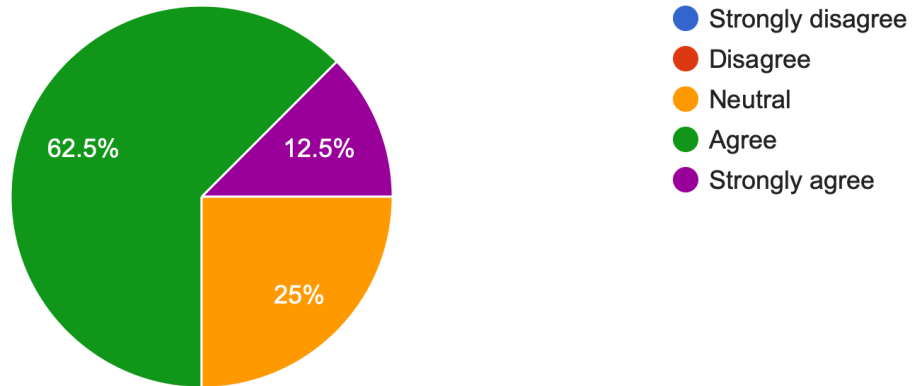

After using this site, you feel that you have a better understanding of how AI systems can fail

8 responses

You are likely to recommend this site to someone to share the wisdom it beholds

8 responses

What did you find most interesting or valuable about the museum?

8 responses

The layouts and information

Despite its simplicity and functionality, it was very educational
the information it gave me?

New to Ai so was interesting finding out how Ai failures are caused

The insight or the description paired with the illustrations is valuable

The game system and the exhibits.

I like the variety of exhibits

The content

What would you change or improve? 8 responses

Improving the layout more

More cases of Ai failures possibly?

more exhibits, more clear point system, better quizzes

As someone who isn't educated AI I came out knowing more than I did entering so from that perspective I can't think of anything to be improved in terms of content. But possibly the layout?

More exhibits

The UI and the site could look bit more inviting.

Add more quizzes

Possible different variety of Failures.Because how how interesting it was I left wanting more. So I will be back for more if there are updaes

Who do you think this site would be most useful for? 8 responses

Anyone interested in tech and AI

Teaching those who are interested in how Ai can go wrong in long run

Anyone who would benefit from learning from mistakes of relying on Ai for important decisions

People like me who are new to AI, Students, business men/women etc. Just anyone wanting learn something :)

People who want to learn more about the boundaries of AI use

People who are researching into the adverse effects of AI and potential drawbacks on over reliance of the technology. The quizzes help user learn about the topic faster than just solely reading articles

People who wanna learn some downsides to AI usage

Students

User Feedback Analysis

Generally, the majority of people who provided feedback had a positive experience on the site. Reports suggest it is easy to navigate, the information page gave mostly enough information (with room for improvement), The quiz questions felt relevant and clear, some things may have behaved unexpectedly for some users but on the whole most things worked ok, sometimes the points were not encouraging or easy to understand, people seem likely to share upon their friends the wisdom of the site. These are

good initial results that suggest we are on the right tack, however we will be aiming for 100% strongly agree by sprint 2. From this feedback we can see that we need to focus on making things clear, ensuring the website works as expected 100% of the time and ensuring all relevant information is given to the user.

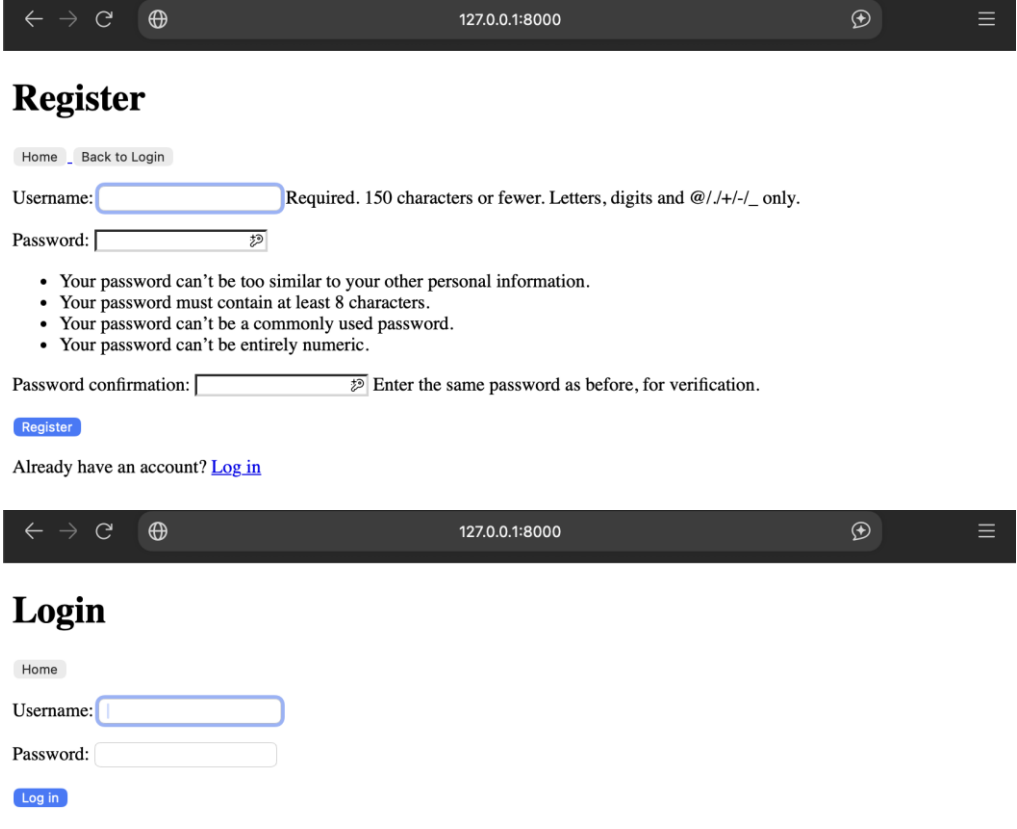

The long form answer section provided insight into what the end user wanted, from things like improving the layout, more cases, a more inviting ui, more interactivity and quizzes and more types of failures. These answers are helpful to understand what aspects to focus on to ensure visitor satisfaction for sprint two. Changes we will make as a result of this feedback include:

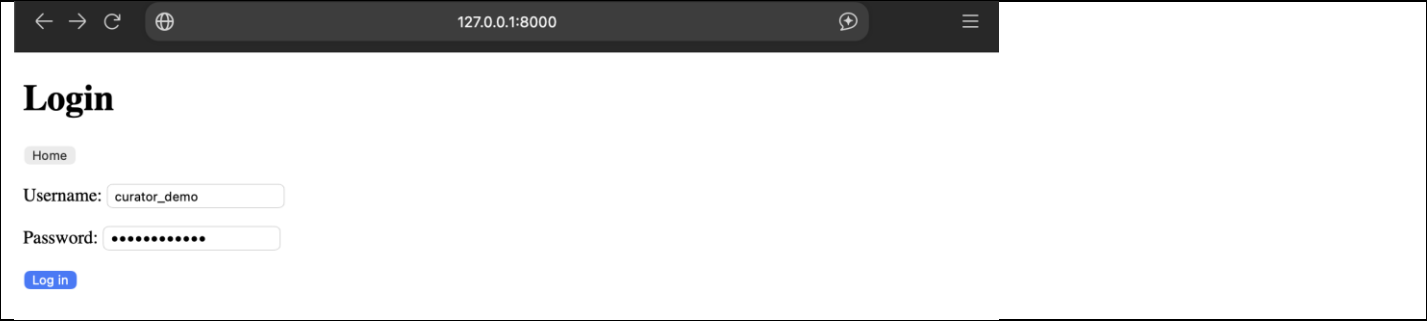

- More exhibits and failure types
- More inviting UI
- More interactive elements (eg. Quizzes)

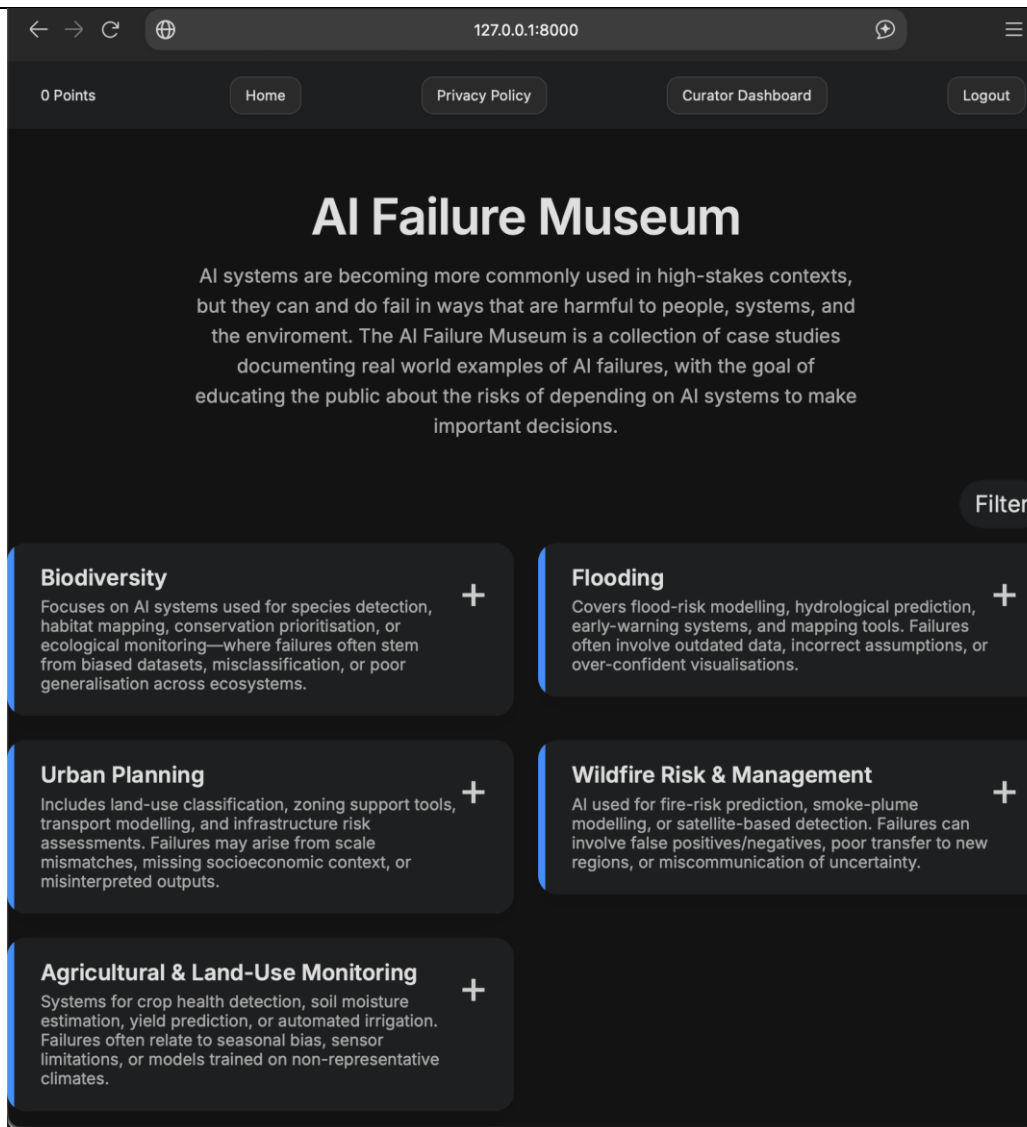

Limitations of this approach

To get people to actually use this form we had to make the process simple, which meant only getting responses from standard visitors (instead of those who created accounts or had higher privileges like curators). This, while reflective of the target viewership of the website, means that no feedback for the curator tools, the log in system ect. Were measured. Therefor all statistics above are in regards to the standard visitor view.

Screenshot appendix

ID	Screenshot	Note
Auth001	 The screenshot displays two views of a web application's authentication interface. The top view is the 'Register' page, which includes a navigation bar with 'Home' and 'Back to Login' links. It features input fields for 'Username' and 'Password', with a note for the username: 'Required. 150 characters or fewer. Letters, digits and @/./+/_ only.' The password field is accompanied by a list of requirements: it cannot be too similar to other personal information, must be at least 8 characters long, cannot be a commonly used password, and cannot be entirely numeric. A 'Password confirmation' field is also present, with a note to 'Enter the same password as before, for verification.' A blue 'Register' button and a 'Log in' link are at the bottom. The bottom view is the 'Login' page, which has a 'Home' link and input fields for 'Username' and 'Password', with a blue 'Log in' button at the bottom. Both pages are shown within a browser window with the address bar displaying '127.0.0.1:8000'.	- Shows registration page - Shows successful redirect to login page

Auth002		- Log in page loaded correctly - When logged in with correct details, was directed to homepage.

AI Failure Museum

AI systems are becoming more commonly used in high-stakes contexts, but they can and do fail in ways that are harmful to people, systems, and the environment. The AI Failure Museum is a collection of case studies documenting real world examples of AI failures, with the goal of educating the public about the risks of depending on AI systems to make important decisions.

Filter

Biodiversity

Focuses on AI systems used for species detection, habitat mapping, conservation prioritisation, or ecological monitoring—where failures often stem from biased datasets, misclassification, or poor generalisation across ecosystems.

Flooding

Covers flood-risk modelling, hydrological prediction, early-warning systems, and mapping tools. Failures often involve outdated data, incorrect assumptions, or over-confident visualisations.

Urban Planning

Includes land-use classification, zoning support tools, transport modelling, and infrastructure risk assessments. Failures may arise from scale mismatches, missing socioeconomic context, or misinterpreted outputs.

Wildfire Risk & Management

AI used for fire-risk prediction, smoke-plume modelling, or satellite-based detection. Failures can involve false positives/negatives, poor transfer to new regions, or miscommunication of uncertainty.

Agricultural & Land-Use Monitoring

Systems for crop health detection, soil moisture estimation, yield prediction, or automated irrigation. Failures often relate to seasonal bias, sensor limitations, or models trained on non-representative climates.

Page not found (404)

Request Method: GET
Request URL: http://127.0.0.1:8000/curator/dashboard%20

Using the URLconf defined in djangoCode.urls, Django tried these URL patterns, in this order:

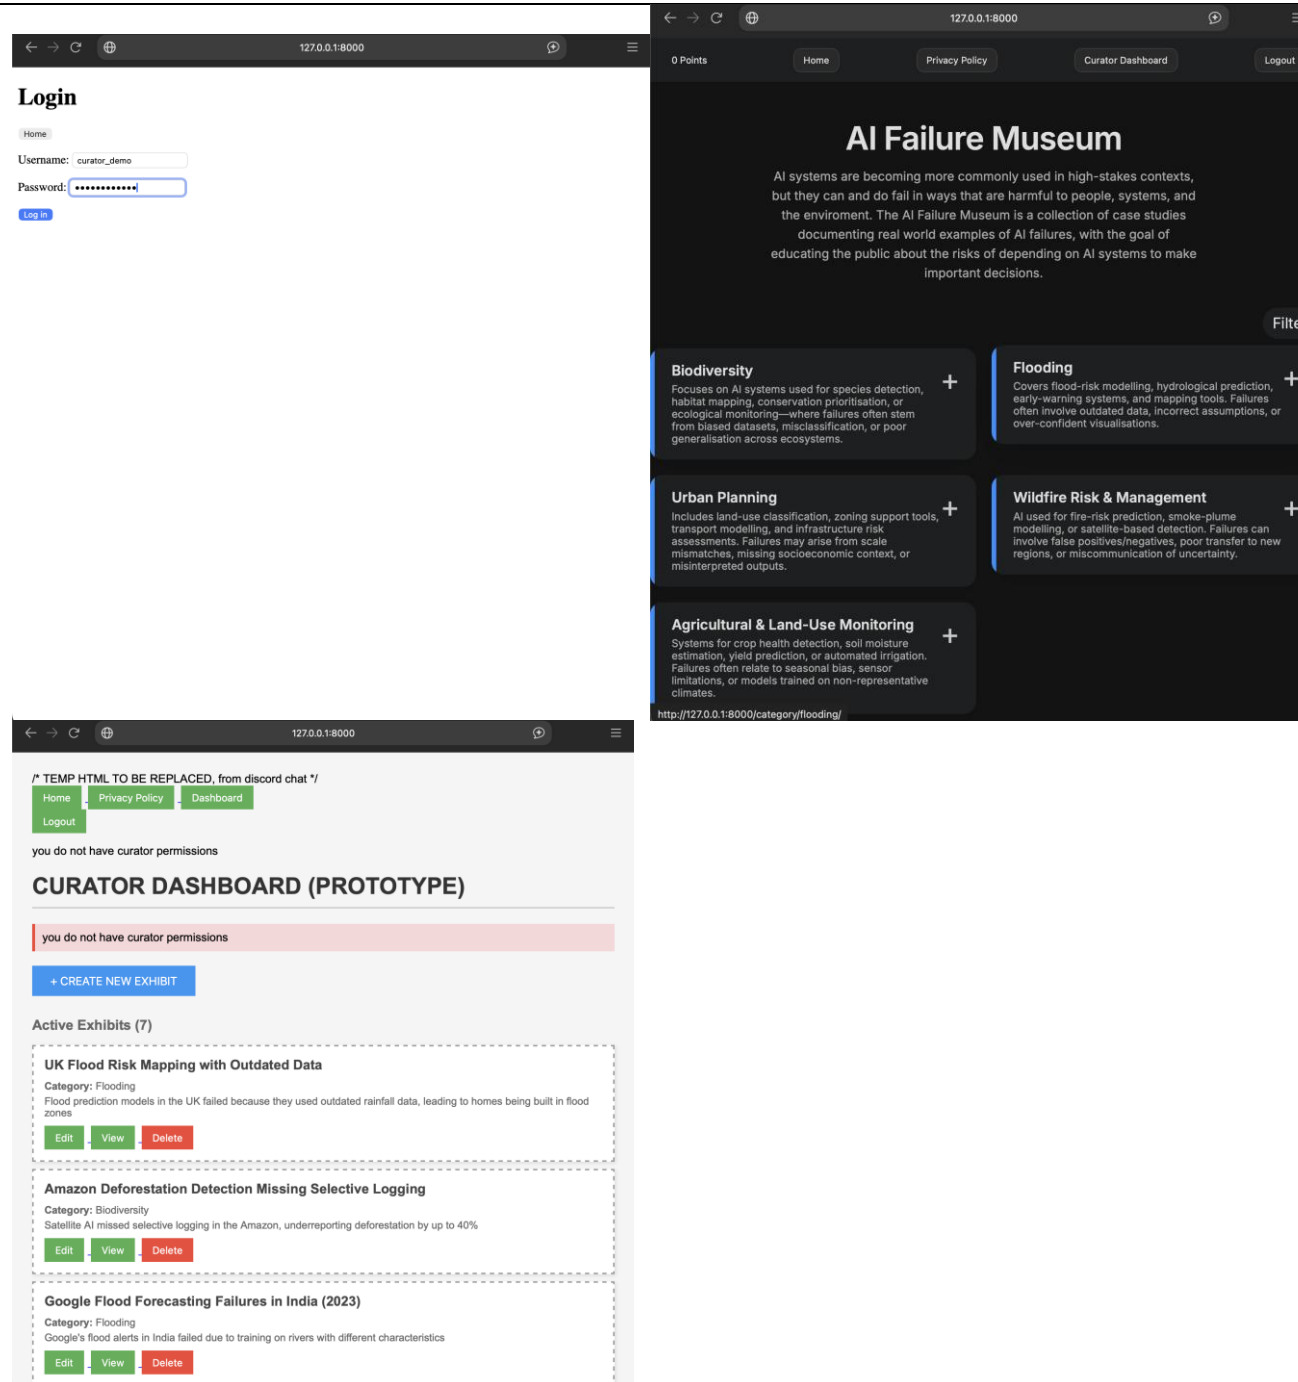

1. admin/
- 2.
3. category/<slug:slug>/ [name='category_detail']
4. login/ [name='login']
5. logout/ [name='logout']
6. login/ [name='login']
7. logout/ [name='logout']
8. register/ [name='register']
9. privacy/ [name='privacy']
10. delete-my-data/ [name='delete_my_data']
11. curator/dashboard/ [name='curator_dashboard']
12. curator/create/ [name='create_exhibit']
13. curator/edit/<int:exhibit_id>/ [name='edit_exhibit']
14. curator/analytics/ [name='analytics_dashboard']
15. curator/create-quiz/ [name='create_quiz']
16. curator/delete/<int:exhibit_id>/ [name='delete_exhibit']
17. curator/ [name='curator_redirect']
18. exhibit/<int:exhibit_id>/ [name='exhibit_detail']
19. quiz/<int:quiz_id>/ [name='take_quiz']
20. quiz/<int:quiz_id>/submit/ [name='submit_quiz']
21. api/quizzes/ [name='api_quizzes']
22. api/quizzes/<int:quiz_id>/ [name='api_quiz_detail']
23. api/quizzes/<int:quiz_id>/submit/ [name='api_quiz_submit']

The current path, curator/dashboard , didn't match any of these.

You're seeing this error because you have DEBUG = True in your Django settings file. Change that to False, and Django will display a standard 404 page.

- Pre and post attempted log in to view dashboard from standard user account

rbac007

- Logging in with valid curator details, getting curator access to dashabord, opening dashboard page

Delete

Crop Yield Prediction Bias Against Small Farms

Category: Agricultural & Land-Use Monitoring

Agricultural AI trained on large US farms failed for smallholder farms, leading to inadequate food security planning

Edit

View

Delete

Urban Heat Island Model Ignoring Informal Settlements

Category: Urban Planning

Heat exposure AI missed slums and informal settlements, failing to identify the most vulnerable populations

Wildlife Camera Trap AI Misidentifying Species

Category: Biodiversity

Failure Type: Domain Shift

Summary: Wildlife AI trained in North America failed when deployed in Africa due to different species and environments

Deployment Context

Conservation camera traps deployed in Africa using North American-trained AI

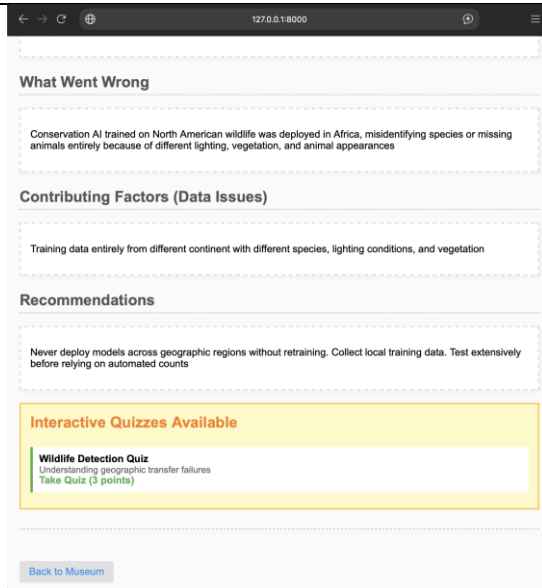

Intended Use

Automatically identify and count wildlife species from camera trap images

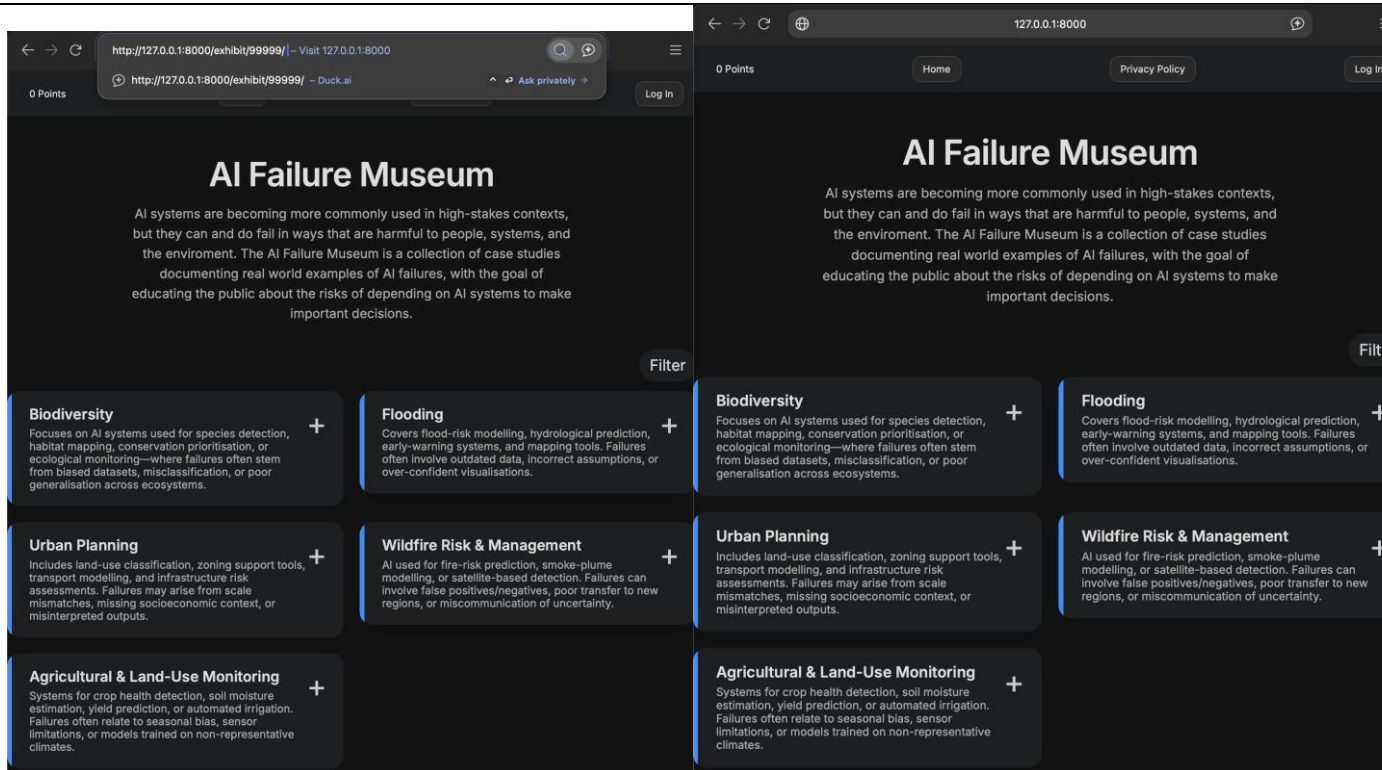

System Type

Computer vision classifier
